

Farouk Afolabi

Full-Stack Developer

+1 (647) 862-7461 | afolabifarouk99@gmail.com | London, ON, Canada | linkedin.com/in/farouk-afolabi | github.com/farouk-afolabi | faroukafolabi.com

SUMMARY

Full-Stack Developer and 2025 Fanshawe College graduate (GPA 3.85 · Dean's Honor Roll) with a WES-certified Master's in Engineering Management. Builds and deploys production-grade React and Node.js applications — including an AI-powered job tracker that integrates the Claude API, live job listing feeds, and automated email digests. Brings a strong engineering background (problem decomposition, system thinking) to every layer of the stack.

TECHNICAL SKILLS

Frontend	React 19, React Router v7, Angular 9, Material UI, Bootstrap, Framer Motion, JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass/SCSS
Backend	Node.js, Express.js, REST API Design, JWT Authentication, bcryptjs, node-cron, Nodemailer (Gmail SMTP)
Databases	MongoDB Atlas, Mongoose, Firebase Firestore, Firebase Realtime Database
DevOps & Tools	Git, GitHub Actions, Docker, Render, GitHub Pages, Vite, Google Analytics
APIs	Anthropic Claude API, Adzuna Jobs API, Jooble API, Firebase Auth

PROJECTS

Job-Tracker App

[GitHub](#) | [Live Demo](#)

React 19 · React Router v7 · Material UI · Node.js · Express 5 · MongoDB Atlas · JWT · Claude API · Adzuna API · Jooble API · Render · GitHub Pages

- Aggregates real-time job listings from Adzuna and Jooble (US & Canada) and uses the Anthropic Claude API to score each role against the user's background, enabling AI-driven application prioritization.
- Built full authentication flow with JWT and bcryptjs, implemented express-rate-limit and environment-based CORS, and automated daily email digests with node-cron and Nodemailer.
- Deployed a decoupled architecture: React SPA on GitHub Pages, Node/Express REST API on Render with MongoDB Atlas persistence.

Sociable — Social Media Platform

[GitHub](#) | [Live Demo](#)

React · Firebase (Auth + Firestore) · Material UI · React Router · GitHub Actions · GitHub Pages

- Designed and built a full-stack social platform with real-time posts, comments, likes, follow/unfollow, and private messaging using Firebase Firestore subscriptions.
- Automated CI/CD pipeline via GitHub Actions for zero-downtime deployments to GitHub Pages on every merge to main.

Farouk's Sports Store — E-Commerce App

[GitHub](#) | [Live Demo](#)

Angular 9 · Bootstrap · Node.js · Express · JSON Server · JWT · Docker · GitHub Actions · GitHub Pages

- Built a full-stack e-commerce application with a responsive Angular frontend, JWT-secured REST API backend, and mock product database via JSON Server.
- Containerized the full stack with Docker and configured GitHub Actions for automated CI/CD deployment.

EDUCATION

Web Development and Internet Applications — 2-Year Diploma

GPA 3.85 · Dean's Honor Roll

2023 – 2025

Fanshawe College · London, ON, Canada

M.Eng. Engineering Management / Industrial Engineering

2020 – 2023

Istanbul Kultur University

B.Sc. Civil Engineering

Afe Babalola University · Nigeria

2013 – 2018
